Third-Party Acceptable Use Policy and Usage Guidelines

Usage of JH Information System Resources

All third-party individuals or entities (non-JH employees) that use or request access to Jack Henry Information Systems or any of its components must agree to and abide by all parts of the Third-Party Acceptable Use Policy And Usage Guidelines ("Policy"). Third party users can be JH partners, vendors, suppliers, or temporary labor. This policy applies to all third party entities and includes their employees who will be accessing JH Information Systems. Reasonable care should be made to ensure all vendors are only given the minimum level of authority. Software vendor support per contract terms acceptable to JH, in JH's sole and absolute discretion, may be approved on a per-case-basis by the Director of CIS in place of this form.

Access to various aspects of the system is determined on an "as needed" basis per job function and business necessity. Use of JH systems is for business purposes only. Any violation of this Policy may result in immediate termination of any partner or other relationship agreement as well as the right to access JH's information system or any of its components.

- Electronic communications and personal directories must be treated as confidential by users and accessed only by the intended recipient. System users are not authorized to read any messages or information that is not intentionally, clearly, and directly sent to them, and that they maintain a valid contractual right to access.
- System users shall not use a code, access a file or retrieve stored information unless authorized to do so in writing. System users shall not attempt to gain access to another user's messages or directories without the owner's permission. If someone else has accessed a user's password(s), the user must change their password(s) immediately.

- The partner company must notify and receive prior written approval from the appropriate JH personnel for all configuration or code changes on JH systems.
- The point of contact for third party users shall notify the JH HelpDesk in writing when an individual who has access to JH systems leaves that organization or is transferred to another position that no longer requires access.
- Only employees or agents of the third party who have prior written approval shall use or access JH resources.
- Third-party users will abide by the security guidelines contained in the Third Party Usage Guidelines described below.
- Third-party users will maintain current contact information with CO – Identity Administration. Users will notify the administrator of any change in contact information, personnel changes, or change in project duration.
- A confidentiality agreement acceptable in form to JH shall be executed by all parties prior to any grant of access.
- No downloads shall be permitted unless a business need is documented and approved by JH management in writing.

Visitors to any JH location enabled with wireless Internet will be offered a Guest Wireless account when they check in with the front desk employees or Security office to get their Visitor badge. Guest Wireless accounts will be created for up to 5 days at a time and access will be for public Internet only. JH does not guarantee any bandwidth or session duration and Visitors will not be granted access to JH's corporate network and/or resources. Guest Wireless accounts will work on the majority of mainstream computing equipment, but not phones. Very limited support will be provided to Visitors having trouble connecting to the Guest Wireless due to the vast amount of issues possible with the Visitors' device.

JH makes no guarantees of protection from electronic attacks, including but not limited to, Denial of Service attacks, viruses, worms, and Trojan Horses. Visitors assume all responsibility for protecting their assets and information from compromise. Attempts to penetrate the JH networks in any way will be viewed as illegal acts and will be prosecuted to the fullest extent of the law.

Guidelines for Usage of JH Information System Resources

Any person using Jack Henry Information Systems¹ any of its components must agree to and acknowledge the following:

- Jack Henry has developed proprietary data processing software, associated products and Information Systems to support the needs of its clients. Access to various aspects of the system is determined on an “as needed” basis by JH per job function and business necessity.
- The Information Systems may not be used for any illegal activity or activity deemed unethical or inappropriate as defined by this and/or other JH policies.
- Users of JH Information Systems are expected to abide by a code of honor to not commit or allow any violation of the tenets of this Policy.
- Any users of JH Information Systems who violates this Policy or uses the systems for improper purposes shall be subject to immediate termination of access.

Specific policies which must be adhered to are set forth below. JH reserves the right to change these policies, as required, without notice.

JH Information Systems Use Policy

General²

- JH Information Systems are company property. Additionally, all content composed on, sent from, synced with, downloaded to, or received on JH Information Systems becomes the property of the company and not the private property of any employee. Any employee composing, sending, syncing, downloading or receiving any content of any nature using JH Information Systems is subject to having the content intercepted, recorded, forwarded, reviewed, and/or archived by the company. This includes monitoring telephone calls for business reasons in order to ensure calls are handled in a professional manner and to promote efficiency in the manner in which customers are treated.
- JH Information Systems are primarily for business use; limited personal use is permitted but must not be excessive or interfere with business needs or

¹ Information systems – A collection of hardware and software components and interconnections, as well as the information contained within that collection and the facilities that contain and protect them.

² Category names are intended only to improve readability and should not be construed to limit the context of any of the policy statements.

operations. Personal use is expected to be on the user's own time and is not to interfere with the person's job responsibilities or access rights.

- JH Information Systems must not be used or accessed by parties who are not JH employees, JH temporary employees, JH contractors, or others expressly authorized to do so, in writing, by JH. Any parties accessing or using JH devices or networks must acknowledge, sign, and adhere to JH's current Acceptable Use Policy and any necessary confidentiality agreement(s).
- Passwords – Users of JH Information Systems must not share passwords to or permit use of JH equipment by members of their households or non-authorized users. Users must not save or store passwords on personal devices (whether manually or using a third-party application) to JH systems, applications, or products.
- The Information Systems must not be used to communicate or publish improper messages or material, e.g., those that are illegal, defamatory, derogatory, obscene or otherwise inappropriate, including sexually harassing or other offensive messages. Among those which are considered offensive are any messages which contain sexual implications, racial slurs, gender-specific comments, or any other comment that inappropriately addresses someone's age, sexual orientation, religious or political beliefs, national origin, or disability.
- The Information Systems may not be used to solicit, proselytize, support, or maintain messages or material for non-JH commercial ventures, religious or political causes, outside organizations, or other non-job-related matters, except as approved, in advance writing, by the JH Legal Department.
- Equipment dedicated to the processing and/or transmittal of financial transactions/data (in particular, machines processing financial transactions on behalf of Customers such as item processing equipment or transaction routing devices), must not be used to access the Internet or have any other usage outside of the equipment's dedicated purpose.
- Users shall not attempt to circumvent the security systems in place on JH Information Systems or devices and shall not use any code, software, "jail breaking"³, "hacking tools (ethical or otherwise) to alter, scan, access, or retrieve stored information, nor may any such code, software, "jail breaking," or

³ Jail breaking" can be defined as a smartphone user seeking out a vulnerability and exploiting it. The breaker may use that vulnerability to get root access to the device and then install another operating system, often a version of the original with restrictions removed.

hacking tools be loaded or utilized on JH corporate devices, unless authorized in advance writing by the Corporate Security Council.

- JH purchases and/or licenses the use of computer software for business purposes and in some cases does not own the copyright to this software or its related documentation. Users will not take any actions that would cause JH to be in breach of any license that JH has for any third-party software or documentation.
- Users will not keep, use, or distribute any JH-owned software, information, or the documentation of JH or any JH licensee or customer in any fashion in contravention of the work-related purpose of said software, information, or documentation.
- Appropriate Response to Network Threats – If the integrity, in part or in total, of the corporate network(s) is threatened such that the stability, security, and/or functionality of the network or any device is jeopardized, Corporate Services reserves the right to take any and all measures necessary to prevent, or lessen, the effects of the event on JH and its customers. All reasonable efforts will be made to contact the user/administrator of the device or network prior to, during, and after taking action.

Internet & JH Network

- Care should be taken when visiting non-business-related web sites as they have potential risks, viruses, malware, etc.
- Do not use an Internet storage site or third-party webmail (such as Gmail, Hotmail, Yahoo, etc., or ISP webmail such as Suddenlink, Cox, etc.) not approved by Corporate Services for sending, receiving, or storing JH company or client information.
- Social Media Policy – Third-party users are prohibited from accessing social media using JH Information Systems.
- Remote Access Policy – Remote Access connections approved by Corporate Services including but not limited to Virtual Private Network (VPN) connections may be granted to users after prior authorization from the user's JH Contact Manager. These connections will be subject to all authentication and security measures as required by the JH Communications Department. Access may be revoked at any time for reasons including non-compliance with Acceptable Use or security policies, request by the user's supervisor or negative impact on overall network performance attributable to remote connections. All remote users are expected to strictly abide by all parts of the Acceptable Use Policy.

- Virtual Private Network (VPN) connections other than those approved by Corporate Services are prohibited from use within, or connecting to the network. TOR browsers or any kind of proxy connection software that circumvents monitoring and security measures shall not be installed or used on JH systems or products, unless authorized by the Corporate Security Council.
- While connected to a wired JH network connection, you may not also have, on the same device; a concurrent session through a JH provided device or other wireless, "tethered," or other Internet connection. For example, while connected to a wired JH network connection, do not use an "air card" (e.g., Verizon Wireless MiFi) to start a separate Internet session.
- JH has the capability and reserves the right to track and monitor use of the Internet and its Information Systems.
- The Information Systems must not be used to visit gambling, sexually explicit, offensive, or inappropriate web sites.
- Any and all postings by an employee to social media, blogs, electronic bulletin boards, electronic mailing lists, professional reference sites, forums, and the like, be they public or private, are subject to the Confidentiality Agreement entered into with JH, prohibiting the release of proprietary information about projects, software products, research and development projects, JH hardware and device configurations, employee or client information (personally identifiable data such as account number, social security number, name and address, etc.), employed software versions and levels, and all other confidential Jack Henry Inc., matters.

Data & Media

- The JH corporate e-mail and instant messaging systems are the property of JH, and all messages composed, sent, or received, and all address book and contact information inputted therein, becomes the property of the company.
- Electronic communications, voicemails, company directories, and personal information stores should be treated as confidential and accessed only by the intended recipient or by authorized personnel as defined by this Policy.
- Internal communications or data (emails, voicemails, files, etc.) regarding JH personnel, client information, products, services, general business, or any information not yet available in the public domain are not to be forwarded or transmitted outside of JH systems.

- Data and files containing JH Corporate or client information must not be stored or backed up using third-party services that are not approved in writing or provided by JH. (Examples of such disallowed services include but are not limited to Carbonite, CrashPlan, Dropbox, GMail Drive, Windows SkyDrive, and Amazon Simple Storage Service).
- Never send unprotected PANs (Primary Account Number – Credit Card Data) by end-user messaging technologies (for example, e-mail, instant messaging, SMS, chat, etc.).
- Users of Information Systems may not use any illegal method to obtain or duplicate any media (software, music, movies, etc.) or related documentation on or in connection with JH Information Systems.
- Users of Information Systems may install business-approved software only. No unauthorized peer-to-peer applications may be installed, including but not limited to BitTorrent, Kazaa, eMule, LimeWire, and uTorrent.
- Instant Messaging Clients and Services – Due to the current technology used by the various third-party Instant Messaging clients and services (for example, Yahoo Messenger, Windows Messenger, AIM, etc.), management has concluded that these services pose an unacceptable risk to the JH enterprise. Attempts to send communications via an instant messaging application other than those approved in writing by JH's Corporate Services (currently Skype for Business) will be treated as a violation of this Policy.

Telecommunications

- Any personal calls made from JH offices that result in additional charges billed to JH may be subject to billing to the User.
- The initiation by users of the recording of telephone calls (other than the routine monitoring of customer calls) is not permitted without the advance written approval of the JH Legal Department.
- Use of established video conferencing facilities (e.g., J7 presentation rooms) is restricted and must be approved by a set list of JH personnel that have the ability to reserve the resources. Unless restricted for security or other reasons for specific groups or facilities, desktop web conferencing for business purposes using hardware and software approved and provided by Corporate Services is not prohibited by this Policy.
